

TIG 200P AC/DC

The **Weldmart TIG 200P AC/DC** is a high-performance welding machine designed for versatility and precision. Equipped with advanced IGBT inverter and digital control technology, it delivers stable output and smooth arc performance for both AC and DC welding. This model supports multiple welding functions, including TIG, pulse TIG, and MMA, making it ideal for a wide range of materials and applications. Its user-friendly front panel layout allows quick parameter adjustments for efficient and accurate welding every time.

FEATURES :

- Using advanced IGBT inverter technology, coupled with digital control system, the control is accurate and reliable.
- Multi-functions with DC pulse argon arc welding , DC argon arc welding , AC pulse argon welding, AC argon welding, manual arc welding and other functions.
- Excellent arc stability for smooth and consistent performance across all materials.
- The layout of front panel is designed in accordance with principle of operation process specification, the overall operation process specification, the overall operation is humanized, and the parameter adjustment is convenient and quick.

Technical Parameter: -

Model	TIG 200P AC/DC
Input voltage	1 phase 240V
Frequency	50/60Hz
Rated Input current	14.7A
Rated input capacity	9.7 KVA
Fuse	40
Open circuit voltage	85V
Output current range	15-250A
Duty cycle	60%
Power factor	≥ 0.85
Insulation Class	F
Shell protection grade	IP21S
Dimensions	445x243x442mm
Weight	16.5 Kg

Sales And Services: -

Weldmart

Head Office: No. 3 & 3A, Persiaran Batu Gajah Perdana 7,
Pusat Komersial Batu Gajah Perdana, 31550 Pusing,
Perak.
